

Title: RePut – Mission, Vision & Leadership

Section 1 – Company Background

RePut is a Bengaluru-headquartered startup focused on transforming global supply chains. The founding team consists of experienced entrepreneurs with previous exits and leadership roles in sectors like grocery delivery, health tech, and bio-energy.

The company's platform unites blockchain and AI to create verifiable, real-time supply chain intelligence. It is designed to support brands that want to move beyond basic reporting and embed traceability, carbon visibility, and circularity directly into their operations.

Section 2 – Mission

RePut's mission is to reshape supply chains worldwide by:

- Providing deep visibility across all tiers
- Enabling organisations to meet and exceed sustainability goals
- Supporting a circular economy through better recovery and reuse of materials

The focus is on high-impact industries where emissions, resource use, and social impact are material, and where better data can directly reduce risk and environmental footprint.

Section 3 – Vision

The company's vision is for supply chains that are fully **traceable, transparent, sustainable, and circular**. In this future:

- Companies know where their inputs come from and can back their claims with verifiable data.
- Stakeholders – including brands, regulators, investors, and end consumers – can trust the information they see.
- Sustainability performance becomes a core part of how supply chains are designed, not an afterthought.

Section 4 – Impact Metrics

RePut highlights early traction metrics such as:

- Double-digit numbers of brands onboarded
- Multi-country deployments
- Millions of tonnes of emissions influenced or diverted through better data and decision support
- Over a hundred suppliers connected into the platform

These numbers signal that the platform is already in use in real supply chains, not just in pilot projects.

Section 5 – Leadership Team

RePut’s leadership combines entrepreneurship, technology, sustainability, and go-to-market experience:

- **Anuj Bishnoi – Co-Founder & CEO**
 - Background: co-founded a major daily-delivery venture in India
 - Focus: overall strategy, product vision, and scaling the company
- **Rohit Mahatma – Co-Founder & CTO**
 - Background: co-founded a health-tech company in the US
 - Focus: platform architecture, AI and blockchain integration, and enterprise-grade security
- **Amit – Co-Founder & Chief Sustainability / Strategy Officer**
 - Background: built a bio-energy business
 - Focus: sustainability, climate impact, and industry-specific solutions
- **Harshit Panday – CMO**
 - Background: IIM-trained marketer with experience at large industrial groups
 - Focus: brand positioning, customer acquisition, and industry partnerships

Section 6 – Advisors & Early Backers

RePut is supported by advisors and investors with backgrounds in:

Large consumer and logistics platforms

- Global public health and UN-linked roles
- Deep-tech ecosystems and risk technology

This ecosystem helps the company navigate both technology and regulatory landscapes as it builds a global product.

Section 7 – Values & Culture

Through its policies and public statements, RePut emphasises:

- Trust, integrity, and transparent communication
- Data protection and security by design
- Inclusive and fair workplaces
- Compliance with privacy and data-handling regulations across jurisdictions

These values are expressed both in product design (e.g., secure, compliance-ready architecture) and in internal policies like data security frameworks, privacy notices, and equal opportunity commitments.
